

LAB EXPERIMENT

ITA0506-COMPUTER VISION

PAVENDHAN A -192321109

EXPNO: 34. Morphological Operation Using Top Hat

Aim

To perform Top Hat morphological operation on an image using OpenCV.

Algorithm

1. Read BEN 10.png.
2. Convert the image to grayscale.
3. Create a morphological kernel.
4. Apply Top Hat operation.
5. Display and save the result.

CODE:

A screenshot of a Python IDE window titled 'EXP-34.py - C:/Users/POORNA SKHT/OneDrive/Tài liệu/computer vision ita0502/lab experim...'. The window contains a menu bar with 'File', 'Edit', 'Format', 'Run', 'Options', 'Window', and 'Help'. The code is as follows:

```
import cv2
import numpy as np

# Read image
img = cv2.imread("BEN 10.png")

if img is None:
    print("Image not found!")
    exit()

# Convert to grayscale
gray = cv2.cvtColor(img, cv2.COLOR_BGR2GRAY)

# Create kernel
kernel = np.ones((5, 5), np.uint8)

# Apply Top Hat
top_hat = cv2.morphologyEx(gray, cv2.MORPH_TOPHAT, kernel)

# Display result
cv2.imshow("Original Image", gray)
cv2.imshow("Top Hat", top_hat)

# Save result
cv2.imwrite("EXP34_top_hat.png", top_hat)

print("Top Hat operation completed successfully!")

cv2.waitKey(0)
cv2.destroyAllWindows()
```

OUTPUT :

```

Top Hat operation completed
```

Result

The Top Hat morphological operation is successfully performed to highlight small bright regions in the image.
